DAVE ROLAND SIYAPZE — Full Stack Developer

Douala, Cameroon · +237 657 546 363 · rsiyapze@gmail.com ·
https://siyapzedaveportfolio.vercel.app/

SUMMARY

Results-driven **Full Stack & Mobile Web Developer** with 3+ years of experience building scalable web and mobile applications across **React Native, React, Laravel, and .NET** ecosystems. Adept at handling full SDLC from **UI/UX design** and **API integration** to **deployment and optimization**. Passionate about creating seamless user experiences through clean architecture. Strong focus on problem-solving, maintainable code, and cross functional collaboration to deliver impactful, production-ready software.

TECHNICAL SKILLS

Languages: Python, JavaScript (Node.js), PHP, C#, SQL, C++

Frameworks / Libraries: .NET, Laravel, React, React Native, Vue

Data / ML: basic ML model integration, code evaluation pipelines, data analysis with Python

Tools / Platforms: SQL Server, Docker, Git, A/B testing, unit testing, CI concepts

Other: SDLC, REST APIs, authentication, payment integration

EXPERIENCE

Full stack Web Developer — GTA Consulting / Iziway Cameroon — Douala, CM

Jun 2022 – Aug 2025

- Developed a drag-and-drop page builder (React + Vite + .NET API) that enabled Iziway's commercial team to visually edit and deploy landing pages on the marketplace without developer intervention. Implemented dynamic block fetching, real-time previews, cache refresh logic, and full integration with the marketplace backend to streamline content updates.

- Delivered and maintained customer-facing and seller portal features for Iziway.cm using C#/.NET and PHP (Laravel), collaborating with product and ops teams to align releases with business goals.
- Led frontend and backend changes that increased user engagement by **20%**, measured via site analytics after performance and UI optimizations.
- Implemented A/B tests to evaluate UX changes and inform conversion improvement strategies; translated results into prioritized product fixes.
- Extended Seller Center modules to simplify vendor product management, reducing onboarding time and manual support workload.
- Promoted code quality and reliability through automated testing, peer reviews, and adherence to agile sprint delivery.

Mobile & Web Developer — FSLI Group — Douala, CM

Sep 2025 – Present

Sportaabe — Mobile Sports Management App (React Native)

- Contributed to the development and maintenance of **Sportaabe**, a sports activities mobile application.
- Led migration from React Native 0.72.4 to 0.81.1, resolving breaking changes introduced in 0.77.1 and stabilizing Android & iOS builds.
  Designed and implemented the tournament management workflow (UI/UX → API integration → lifecycle validation).
- Collaborated closely with backend engineers to validate endpoints and ensure seamless user experience across the tournament lifecycle.

Lassoos — Multi-tenant ERP System (Web Platform)

- Developed and maintained core ERP modules within **Lassoos**, including invoice management compliant with EU Factur-X standards.

- Automated hybrid PDF + XML invoice generation with full data validation and end-to-end testing.
- Built and optimized the ERP landing page using React with motion design, parallax scrolling, and interactive UI components to improve brand perception and engagement.

Sales Management Application (PWA — Offline-First Architecture)

- Designed and developed a **Sales Management Progressive Web App (PWA)** for field sales teams, enabling real-time and offline sales operations.
- Implemented **offline-first architecture**, allowing:
  - Order creation without internet connectivity
  - Local data persistence (IndexedDB / local storage strategy)
  - Background synchronization once connection is restored
  - Conflict handling and data integrity validation
- Enabled installation as a native-like app on mobile and desktop devices.
- Optimized performance for low-connectivity environments common in field operations.
- Improved operational efficiency of the sales team by reducing dependency on constant internet access and minimizing data-entry delays.

PERSONAL PROJECTS

AI-Powered Coding Assessment Platform — *Jan 2025 – Jun 2025*

- Designed and prototyped an automated code-scoring pipeline that integrates static analysis and ML-based heuristics to auto-grade candidate submissions, reducing manual screening effort during pilot evaluations.

- Implemented REST APIs for submission intake and scoring, and dashboard endpoints for hiring teams to shortlist candidates faster.

Full-stack E-commerce MVP — *Nov 2021 – Jan 2022*

- Built an end-to-end e-commerce prototype (auth, product search, filters, cart, checkout & payment integration) used to validate product/market fit and demo the platform to potential vendors and early customers.

Job Search Mobile App (React Native) — *May 2023 – Jul 2023*

- Developed a mobile job-listing app to increase reach to mobile users and demonstrate cross-platform deployment; implemented searchable listings and user flows that mirrored web experience.

EDUCATION

Bachelor of Engineering, Computer Engineering — Institut Universitaire de la Côte, Douala
Sep 2021 – Jul 2025

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Office Specialist — PowerPoint & Excel (2019)
- IUC Bootcamp participant; Microsoft Office competition placements.

TRANSFERABLE SKILLS & OTHER

- **Collaboration & Communication:** worked cross-functionally with product, QA and ops to ship features.
- **Problem solving & tutoring:** experience tutoring (Pythagore) — explains technical concepts clearly to peers and junior devs.
- **Languages:** English (fluent), French (native), German (basic).
